EDUCATION

La Trobe University

Melbourne, Australia

Master of Information Technology (Specialising in Artificial Intelligence)

2025 - Jul 2027

The British College

Kathmandu, Nepal

BSc (Hons) Computing — First Class Honours

2021 - 2024

EXPERIENCE

I.T. Security College of Computer Studies

Oct 2024 - Nov 2025

Junior Software Engineer

Kathmandu, Nepal

- Implemented Figma designs into pixel-perfect Jetpack Compose UIs for school and college management apps, delivering responsive layouts across phones, tablets, and various screen densities.
- Applied Google Material Design guidelines and design tokens to build consistent UI components for student-facing features including timetables, attendance, and results.
- Implemented MVVM/MVI architecture with Dagger/Hilt across multiple educational apps, ensuring clean separation of UI state and business logic.
- Set up CI/CD pipelines using Docker and Jenkins with automated test gates, streamlining build and release processes for the team.

Hochschule Zittau/Görlitz

June 2024 - Aug 2024

Research Intern

Zittau, Germany

- Conducted heuristic evaluations and user research to enhance interaction design of wearable interfaces, documenting findings to improve spatial UX for departmental research use.
- Developed voice-controlled Android apps in Java and Kotlin for Real Wear Navigator 520 wearable hardware, integrating REST APIs for real-time data retrieval.
- Prototyped a 3D CAVE environment in Unity for spatial AR/VR interaction research, applying multi-threaded rendering and structured concurrency patterns.

The British College

Feb 2024 - May 2024

Teaching Assistant - Developing Mobile Applications

Kathmandu, Nepal

- Worked under the mentorship and guidance of Miss Anita Gurung Rana, Assistant Programme Leader, supporting the delivery of the Developing Mobile Applications module.
- Facilitated weekly lab sessions on UI principles, design thinking, and heuristic evaluation for a cohort of undergraduate students.
- Guided students through Android app development using Jetpack Compose, providing design feedback aligned with Material Design and usability best practices.
- Supported students in applying human-centered design methods, from user research and wireframing through to high-fidelity prototyping and usability testing.

- Implemented Google Material Design guidelines to faithfully translate Figma designs into production UI, ensuring visual consistency across components and interaction states.
- Built and maintained Android (Kotlin/Java) and iOS (Swift/SwiftUI) features using MVVM architecture, Retrofit for REST API integration, and Room for local persistence.
- Integrated biometric authentication (BiometricPrompt / LocalAuthentication) and Google Maps SDK across both Android and iOS platforms.

PROJECTS

Ova Cart – Mobile App UI Redesign | [Figma](#)

- Crafted Ova Cart, a fruit and vegetable delivery app and web platform, covering end-to-end UX from sitemap and user flow mapping to high-fidelity Figma prototypes with interactive prototyping.
- Established a comprehensive design system including a colour system, type system, and reusable component library, ensuring visual consistency across mobile app and website surfaces.
- Built a moodboard to define the product's fresh, organic visual identity.

ZhenKala – Authentic Himalayan Marketplace | [GitHub](#)

- Full-stack e-commerce platform built with React, Node.js, Express, and MongoDB, deployed on AWS EC2 with Docker and GitHub Actions CI/CD.
- Designed responsive UI components with a focus on interaction design and user flow, ensuring a consistent shopping experience across desktop and mobile breakpoints.
- Built an analytics dashboard with real-time net-profit visualisation and dynamic cost-per-variant tracking, integrating Stripe and PayPal payment APIs.

Kastha – AR Furniture Platform | [GitHub](#)

- Implemented ARCore-powered spatial product visualisation with responsive layouts and interaction design patterns, backed by a Spring Boot REST API and MySQL.
- Engineered a Firebase Realtime Database chat system enabling live interaction between store staff and customers, with low-latency messaging using Kotlin Coroutines.
- Built JWT-based authentication and authorization, image upload and retrieval, and automated deployments via Docker and GitHub Actions CI/CD.
