EDUCATION

La Trobe University

Master of Information Technology

Melbourne, Australia

Nov 2025 – July 2027

The British College

BSc (Hons) Computing

Kathmandu, Nepal

Sept 2020 – Sept 2024

- Recipient of the Student Excellence Award for academic and extra-curricular leadership.

EXPERIENCE

I.T. Security College of Computer Studies

Junior Software Engineer

Kathmandu, Nepal

June 2025 – Nov 2025

- Migrated legacy Java modules to **Jetpack Compose** and **Kotlin Multiplatform**.
- Architected a full **CI/CD pipeline** using **GitHub Actions** to automate **Docker** containerization & deployment.
- Deployed and managed a scalable **Kubernetes (K8s)** cluster on **AWS EC2**.
- Configured **Nginx Reverse Proxy** for secure domain routing and implemented **SSL (HTTPS)** termination.
- Optimized build cycles by configuring **Gradle** build variants and automated release workflows.

Upwork

Freelance Android Developer: Google Play

Remote

Sept 2024 – May 2025

- Developed and scaled three Android applications to **1M+ total downloads** on the Google Play Store, including a specialized modding utility for Minecraft PE.
- Engineered a file-system integration layer to manage system and application data storage, enabling automated installation of assets into external game directories.
- Integrated **Google AdMob** for monetization and monitored application health using **Firebase Crashlytics**, maintaining a **99%** crash-free user sessions rate.

Hochschule Zittau/Görlitz

Research Intern

Zittau, Germany

June 2024 – Aug 2024

- Built voice-controlled wearable apps for **RealWear Navigator 520** using Kotlin and Spring Boot.
- Optimized **MySQL** database schemas, achieving a 20% increase in AR data retrieval speeds.
- Developed a 3D prototype for a **CAVE** environment using **Unity** and spatial interaction logic.

F1Soft International

Software Engineering Intern

Kathmandu, Nepal

Sept 2022 – Feb 2023

- Implemented secure **Biometric Authentication** flows for financial transaction security.
- Integrated **Google Maps API** for location-based merchant discovery and transaction tracking.

PROJECTS

Kastha - AR Furniture Platform

ARCore, Spring Boot, AWS, Firebase, GitHub Actions

Jan 2024 – May 2024

- Developed an AR marketplace using **ARCore** with horizontal/vertical plane detection logic.
- Built a secure **Spring Boot** backend with **JWT-based Auth** and **RESTful APIs**.
- Implemented real-time customer support chat functionality using **Firebase**.
- Automated AWS deployments via **GitHub Actions** for continuous integration.

TECHNICAL SKILLS

Languages & Libraries: ARCore, Firebase, Java, JavaScript, Jetpack Compose, Kotlin, Kotlin Multiplatform, PHP, React, Scikit-learn, Spring Boot, Supabase, Swift, TensorFlow, TypeScript

Tools & Platforms: Android SDK, AWS (EC2, RDS, Route 53, S3), Docker, Git, GitHub Actions, Gradle, iOS Development, Jenkins, Kubernetes, Nginx Reverse Proxy
