WORK EXPERIENCE

Academic Tutor (CSE2UI: User Interface Design)

La Trobe University

June 2026 – Present
Melbourne, VIC, Australia

- Led practical workshops and interactive lab sessions on UI/UX engineering, design thinking, user research synthesis, and rapid prototyping for 120+ undergraduate students.
- Guided students through **Figma wireframing**, interactive prototyping, and heuristic usability testing to identify usability bottlenecks and validate design decisions prior to code execution.

Software Engineer

I.T. Security College of Computer Studies

Oct 2024 – Nov 2025
Kathmandu, Nepal

- Spearheaded a full cross-platform migration from native Android and iOS codebases to **Kotlin Multiplatform (KMP)**, using **Gradle product flavors** to power white-label applications deployed across 12+ educational institutions for 15,000+ active students and parents.
- Engineered dynamic real-time data synchronization and live chat infrastructure by integrating **Firebase** and modern Android Jetpack libraries (**ViewModel**, **LiveData**, **Navigation**, **Coroutines**).
- Implemented end-to-end **CI/CD pipelines** utilizing **Git**, **Docker**, and **GitHub Actions** to automate testing and build deployments, significantly reducing manual release cycles and maintaining zero-downtime application continuity.

Android Developer Intern

F1Soft International

Sept 2022 – Feb 2023
Kathmandu, Nepal

- Engineered core mobile banking application features deployed across 50+ financial institutions, architecting scalable mobile layers using **MVVM**, **Clean Architecture**, and **Dagger/Hilt** for dependency injection.
- Designed and implemented secure end-to-end payment flows to transmit data payloads seamlessly with external partner bank networks.
- Developed complex custom Android views using **XML Layouts** and authored automated unit and UI testing suites using **JUnit** and **Espresso** to ensure robust payment flow stability.

RESEARCH EXPERIENCE

Graduate Research Assistant

La Trobe University (Advisor: Dr. Huawei Tu)

March 2026 – Present
Melbourne, VIC, Australia

- Developed a novel Walk-in-Place (WIP) VR locomotion framework in **Unity** utilizing **HTC VIVE** headsets and **Ultimate Trackers**.
- Designed real-time WIP algorithms combining eye-gaze tracking and body kinematics, computing user velocity proportional to focal distance, leg cadence, and arm swing to mitigate cybersickness.

Research Intern

Hochschule Zittau/Görlitz (Advisor: Prof. Dr. Knut Meissner)

June 2024 – Aug 2024
Zittau, Germany

- Architected a hands-free, voice-controlled **Android Jetpack Compose** application for the RealWear Navigator 520 smart glasses to streamline warehouse operations, including task assignment to robots and inventory management.
- Engineered the backend infrastructure using **Spring Boot** and **SQL**, deploying microservices on **AWS (EC2, RDS, Route53)** with **Jenkins** automating the **CI/CD build and deployment pipelines**.
- Built a functional 3D CAVE environment prototype in **Unity** for spatial research and hardware testing within university laboratories.

EDUCATION

Master of Information Technology (Specialization in Artificial Intelligence)

La Trobe University

Nov 2025 – June 2027
Melbourne, VIC, Australia

BSc (Hons) Computing

The British College (Degree awarded by Leeds Beckett University, UK)

Feb 2021 – Sept 2024
Kathmandu, Nepal
